

Key Features:

Unparalleled Precision

Engineered with a specific burr geometry tailored for filter brewing, the Dark-T® burrs guarantee a consistent grind size, unlocking the true potential of your coffee beans. Experience the perfect balance of finesse and uniformity, allowing you to extract nuanced flavors in every cup.

Minimal Retention, Maximum Freshness

With an impressively low retention rate ranging between 0.1 to 0.2 grams, the AllGround Pro ensures that your coffee beans are ground precisely when you need them. Say goodbye to staleness and hello to unparalleled freshness in every brew.

Customized Grind Settings

Embrace complete control over your brewing process with customizable grind settings. Fine-tune the coarseness to suit your preferences, from a delicate pour-over to a bold French press, all easily adjustable with precision.

Sleek Design, Premium Build

Elevate your kitchen aesthetic with the AllGround Pro's sleek design and premium build. Its compact size seamlessly integrates into any space while exuding elegance and sophistication.

Dark-T® Burrs

64mm burrs, coated in titanium, aluminum, carbon, and nitrogen, ensures durability that exceeds standard burrs by 5 times, as verified in laboratory tests.

Description:

Elevate your coffee experience to new heights with the Fiorenzato AllGround Pro Home Grinder, designed exclusively for filter brewing coffee aficionados. Crafted with specialized Dark-T® burrs and engineered with meticulous precision, this grinder redefines excellence in grinding technology.

Indulge in the art of brewing with the Fiorenzato AllGround Pro Home Grinder. Elevate your coffee ritual, unlock flavors like never before, and savor every moment with each meticulously ground bean. Experience the pinnacle of precision and freshness, crafted for the discerning filter coffee connoisseur.
